

Laurel Park School

- Faster service and improved student experience.
- Streamlined operations and error reduction.
- Enhanced reporting and reliability.

Cashless POS case study

Establishment type: Secondary school

Aim: Laurel Park School required a cost-effective and simple solution that met their requirements. A system that streamlined meal service, ensuring students had enough time to eat and enjoy their lunchtime before returning to class.

Solution: A digital Cashless POS solution.

Impact: Laurel Park School has significantly reduced the queue times allowing students to enjoy their lunchtime and has given their reporting a “much needed boost”.

What did Cashless POS offer?

Laurel Park School previously used an outdated POS system that was reaching the end of its life. Our solution offered a modernised and reliable POS solution that ensured their meal provision would become more efficient. Secondly, Cashless POS enabled Laurel Park School’s kitchen to view all reporting in real-time, greatly improving their ability to report on their school meal uptake.

- Introduced a QR code system that significantly reduced queue times, giving students more time to eat and enjoy their lunchtime.
- Automated FSM processing eliminating staff errors and reducing administrative burden.
- Real-time monitoring with improved reporting tools.

What was the school looking for?

Laurel Park School required a modern and cost-effective upgrade to their POS system that streamlined its school meal provision. The secondary school required a system that decreased service times while enhancing reporting capabilities, providing better budgeting support and detailed insights into their school meal provision.

I’d say this is an excellent choice if you’re looking to upgrade or replace an existing Cashless POS system.”

Karen Elsom, Senior Finance Officer

The results

Since implementing Cashless POS, Laurel Park School has increased efficiency in their operations with reduced queue times and streamlined transactions with the QR code system. The solution delivered a centralised POS system backed by a responsive onboarding process.

The Cashless POS solution not only boosts efficiency in Laurel Park School's meal provision but also greatly improves their reporting capability on their school meal provision.

In summary, Cashless POS has significantly reduced queue times for Laurel Park School, improving students behaviour in the afternoon. The Cashless POS system has improved daily tasks making them much smoother and less time-consuming.

The student recognition is very efficient, and the reporting tools are game changers for anyone needing detailed insights."

Karen Elsom, Senior Finance Officer

The onboarding process was straightforward, and it's been a breeze to integrate our daily operations. The system has delivered on its promises, giving us faster processing, dependable student recognition, and a much-needed boost in reporting quality."

Karen Elsom, Senior Finance Officer
